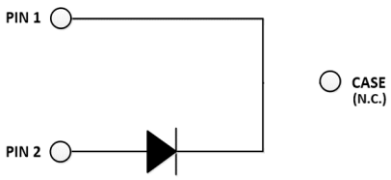
4th Generation 650V/6A SiC Schottky Barrier Diode

Features

- Ceramic Package Provides 2.5kV Isolation
- Revolutionary semiconductor material - Silicon Carbide (SiC)
- No reverse recovery
- High-speed switching performance
- Temperature-independent switching behavior
- System cost / size savings due to reduced cooling requirements
- Junction temperature range from -55℃ to 175℃
- RoHS compliant



Package Type: TO-220N-2L

Potential Applications

- Industrial power supplies: Industrial UPS
- Battery chargers
- Solar inverters
- Switch mode power supplies

Description

The SDS065J006N4 SiC Schottky Barrier Diode (SBD) has been developed using Sanan's advanced 4th generation SiC SBD technology with the highest performance and reliability. It registers higher efficiency, higher operation temperature and lower loss and can be operated at higher frequency than Si-based solutions. As to the Schottky structure, it shows no recovery at turn-off and allows a low leakage current with reverse voltage up to 650V. It can contribute to system miniaturization and achieve lightweight system design. Using RoHS compliant components, it is qualified for use in industrial application.
