

# 3<sup>rd</sup> Generation 650V/12A SiC Schottky Barrier Diode

## Features

- Revolutionary semiconductor material - Silicon Carbide (SiC)
- No reverse recovery
- High-speed switching performance
- Temperature-independent switching behavior
- System cost / size savings due to reduced cooling requirements
- Junction temperature range from -55°C to 175°C
- RoHS compliant

Package Type: DFN 8\*8-4L

## Potential Applications

- Industrial power supplies: Industrial UPS
- Battery chargers
- Solar inverters
- Switch mode power supplies

## Description

The SDS065J012S3 SiC Schottky Barrier Diode (SBD) has been developed using Sanan's advanced 3<sup>rd</sup> generation SiC SBD technology with the highest performance and reliability. It registers higher efficiency, higher operation temperature and lower loss and can be operated at higher frequency than Si-based solutions. As to the Schottky structure, it shows no recovery at turn-off and allows a low leakage current with reverse voltage up to 650V. It can contribute to system miniaturization and achieve lightweight system design. Using RoHS compliant components, it is qualified for use in industrial application.

## Product Specifications

| Device       | V <sub>RRM</sub> | I <sub>F</sub> (135°C) | V <sub>F</sub> (25°C) | Q <sub>C</sub> | Marking    |
|--------------|------------------|------------------------|-----------------------|----------------|------------|
| SDS065J012S3 | 650V             | 21A                    | 1.30V                 | 34nC           | DS065012S3 |
